PROJECTS

Hospital Api | [GitHub](#) | [Hosted Url](#)

- Developed a **server-side API** catering to hospital needs, focusing on COVID-19 patient testing, quarantine, and overall well-being..
- Key Feature: 1. User Types: Doctors, Patients 2. Login System: Doctors can securely log in. 3. Patient Visit Workflow: - Registration: Doctors register patients within the app during visits. - Report Creation: After checkups, doctors generate detailed patient reports. 4. Patient Reports Include: - Created by Doctor - Status: [Negative, Travelled-Quarantine, Symptoms-Quarantine, Positive-Admit] - Date of Report
- This project streamlines the medical process, ensuring efficient tracking and management for healthcare professionals dealing with COVID-19 cases.
- Tech Stach:- Node, Express, MongoDB, Passport, JWT

Albums | [GitHub](#) | [Hosted Url](#)

- Developed an Albums web app to create your own albums list.
- Features- Fetch and show albums, add new album, update, and delete album.
- Tech Stach:- HTML, CSS, and JavaScript, Tailwindcss, Axios, React-Router, Vite

Habit Tracker | [GitHub](#) | [Hosted Url](#)

- Developed a Habit tracker App aims to track and maintain streak of habits for individuals.
- Tech Stach:- Node, Express, MongoDB, EJS
- Features- Adding and deleting habits, complete track of all added habits, Week view of all added habits, changing status of habits (done, not done, none) everyday, Modify status of previous seven days of each habit.
